Detailed Action

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 1-34 and 39-55, drawn to a method of controlling a semiconductor manufacturing system, classified in class 438/5

II. Claims 35-38, drawn to a graphical user interface (GUI) for utilizing the process model to predict process control output data, classified in class 345/619.

Inventions II and I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus, or (2) the apparatus as claimed can be used to practice another and materially different process (M.P.E.P. 806.05 (e)). In this case, another materially different apparatus, such as GUI used in automobile manufacturing plant in controlling robot arms or manufacturing machines in food processing plants can be used to practice the apparatus as claimed.
